OBJECTIVE

- Seeking an internship or co-op to contribute to building scalable, intelligent systems by leveraging experience in APIs, software development, and AI-powered solutions.

EDUCATION

York University, *B.S. Hons. in Computer Science*

Sept 2022 - Present

SKILLS & CERTIFICATIONS

Languages: Java, Python, C, JavaScript, SQL, jQuery

Cloud & Databases: Azure, AWS, MySQL, PostgreSQL, MongoDB

Web-Technologies/Frameworks: HTML5, CSS3, Angular, Django, React.js, Express.js, Node.js (MERN Stack)

App/Game Development: Java Swing, Android Studio

Analytics & BI: Power BI, SAP Analytics Cloud

Low-Level & Assembly: Verilog, RISC-V

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Postman, Jira, Confluence

Core Competencies: Data Structures & Algorithms, Data Mining, AI/ML, Operating Systems

EXPERIENCE

Software Engineer Intern, *Bank of Montreal*

Jan 2026 - Present

- Enhance and operate a **production RAG-based AI agent**, managing document ingestion, chunking, embeddings, and vector search to deliver real-time LLM responses for BMO insurance advisors using **Python and Azure**.
- Identify and mitigate **bias in LLM outputs** by analyzing prompt behavior and retrieval context, introducing guardrails to improve response accuracy in production.
- Perform end-to-end debugging across **Angular** frontend and backend APIs, using **Postman** and root-cause analysis to resolve failures and improve the reliability of the agent.

Business Intelligence Engineer Intern, *City of Toronto*

May 2025 - Aug 2025

- Partnered with cross-functional engineering and enterprise teams to strengthen **sprint planning**, streamline **workflows**, and enhance project transparency.
- Tested and troubleshooted **SAP Ariba** and **S/4HANA** scripts, analyzed processes to identify and resolve issues, and ensured seamless execution of **B2B** procurement processes.
- Strategized and implemented BI integrations using **SAP Analytics Cloud** and **Power BI**, delivering interactive dashboards that improved insight delivery by **40%** over conventional tools.

PROJECTS

YUtalent, *A Full-Stack Web Application*.

Nov 2024 - July 2026

- Built a **student-focused portfolio showcase platform** through the **MERN stack** to enable seamless interactions.
- Optimized **RESTful APIs** with **Cloudflare API** integration to enable scalable media storage and efficient CRUD functionality.
- Implemented **JWT-based authentication** to ensure secure user access and platform reliability.
- Enhanced user management to **improve system functionality** and **user experience**.

VoiceDebugger, *An AI-Powered Voice-Supported Debugging Tool*.

Feb 2025 - May 2025

- Designed and developed an innovative **AI-driven debugging tool**, enabling developers to resolve issues with **natural language commands**, increasing accuracy by **60%** compared to traditional typed inputs.
- Built a real-time, voice-enabled interface using **speech_recognition** and **pyttsx3** for seamless developer interaction.
- Integrated the **OpenAI API** to analyze code snippets and generate instant, **voice-assisted solutions** effectively.

Stock Market Price Prediction, *A Machine Learning Model*.

Aug 2024 - Nov 2024

- Utilized **Python** libraries such as **yfinance** and **Pandas** to efficiently fetch, clean, and preprocess stock data for financial analysis.
- Normalized financial time series using **MinMaxScaler** to ensure data consistency and enhance model performance.
- Developed and trained an **LSTM** model with **TensorFlow** and **Keras** to forecast next-day stock prices, achieving over **50%** prediction accuracy.
